LS Industries offers a variety of
cylinder blasting equipment
to match your needs.

PBX Propane Blasters

LS Industries PBX is built for long life with superior cleaning action and can blast up to four cylinders at a time.

Features

- **2 - 20HP reverse blast wheels**

The reverse blast wheels have a robust design, are belt-driven to protect the motor, allows for an all angle cleaning, and easy to maintain.

- **Spring loaded bars**

Spring loaded bars create a fast load and unloading.

- **Replaceable cabinet liners**

Replaceable cabinet liners gives you a long machine life and easier maintenance.

- **LS TurboShot™ wheel**

Throws a high-volume of shot with a bi-directional blade.

LSE Cylinder Blasters

LS Industries LSE is the most economic shot blasters on the market. Able to clean 20"-30" diameter to 68" long.

Features

- **Replaceable cabinet liners**

Replaceable cabinet liners gives you a long machine life and easier maintenance.

- **Lift table**

The lift table helps raise and lower the cylinders

- **Manual kick out bar**

The kick out bar is designed to make loading and unloading easier

PTB Propane Blasters

LS Industries PTB is designed to blast cylinders up to a standard 500 gallon cylinder. The rollers are adjustable to accommodate various cylinder sizes.

Features

- **Replaceable cabinet liners**

Replaceable cabinet liners gives you a long machine life and easier maintenance.

- **4 - LS TurboShot™ wheel**

Throws a high-volume of shot with a bi-directional blade.

Features

- **Replaceable cabinet liners**

Replaceable cabinet liners gives you a long machine life and easier maintenance.

- **Lift table**

The lift table helps raise and lower the cylinders

- **Automatic Kick out bar**

The kick out bar is designed to make loading and unloading easier

BSC Cylinder Blasters

LS Industries LSE is a small footprint batch blaster. Able to clean 20"-30" diameter to 68" long and has a clam shell door that allows overhead loading and unloading.

CTB Chlorine Blasters

LS Industries CTB makes it safe and quick to remove rust, dust, paint, and other contaminants from the surface of the tanks.

Features

- **Replaceable cabinet liners**

Replaceable cabinet liners gives you a long machine life and easier maintenance.

- **Lift table**

The lift table helps raise and lower the cylinders

- **Pneumatic kick out bar**

The kick out bar is designed to make loading and unloading easier

Flow Through Washers

LS Industries Flow Through Washer cleans your industrial metal parts or cylinders by simply loading them on the conveyor belt.

Features

- **Insulated wash tank**

- **Filter debris screen**

- **24" w conveyor belt**

- **10HP seal-less pump (180 GPM)**

- **On/Off wash cycle**

BFCLP-XL Flow Through

LS Industries BFC-XL Flow Through Blaster is designed to remove rust, dust, dirt, trash, and labels off 20 - 100 lb cylinders.

Features

- **2 - 10HP reverse blast wheels**

The reverse blast wheels have a robust design, are belt-driven to protect the motor, allows for an all angle cleaning, and easy to maintain.

- **Flow through technology**

The flow through aspect of the BFCLP-XL allows a consistent blast for an even finish and reduces worker fatigue.

- **LS TurboShot™ wheel**

Throws a high-volume of shot with a bi-directional blade.

BFC-XL Flow Through

LS Industries BFC-XL Flow Through Blaster is the most efficient high pressure gas cylinder blaster on the market. It is able to blast welding gas and other high pressure cylinders quickly and efficiently.

Features

- **2 - 15HP reverse blast wheels**

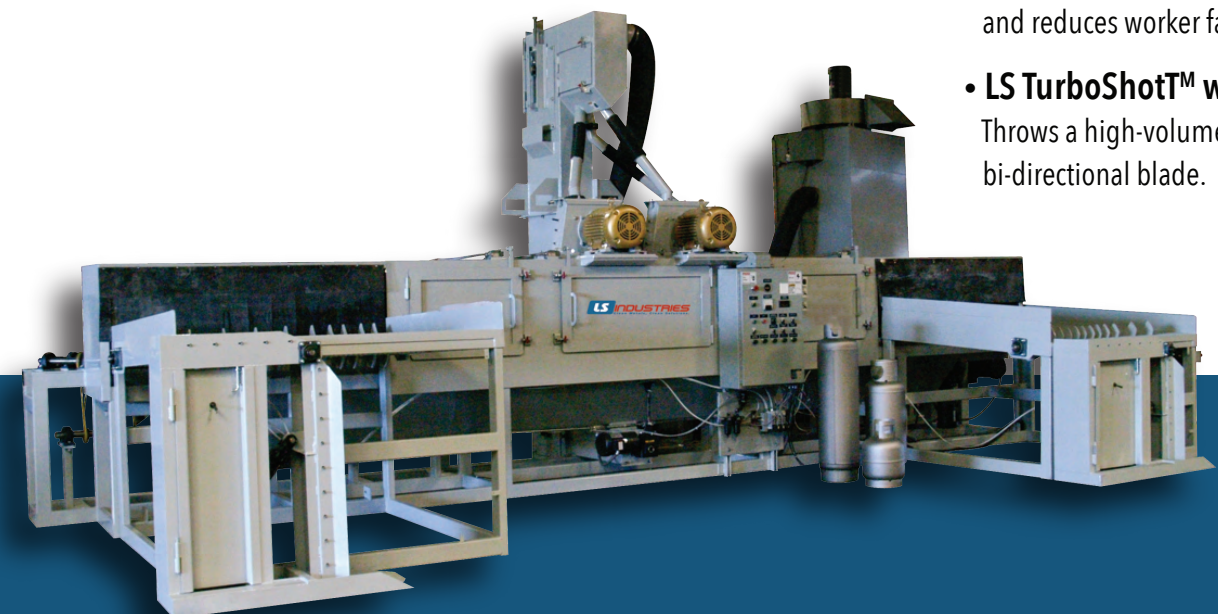

The reverse blast wheels have a robust design, are belt-driven to protect the motor, allows for an all angle cleaning, and easy to maintain.

- **Flow through technology**

The flow through aspect of the BFCLP-XL allows a consistent blast for an even finish and reduces worker fatigue.

- **LS TurboShot™ wheel**

Throws a high-volume of shot with a bi-directional blade.

For 47+ years, LS Industries has designed and manufactures a diverse product line of custom surface treatments and metal cleaning equipment. In addition to the ability to develop custom equipment solutions, LS Industries also provides highly responsive service for your equipment. LS Industries has a global presence as a leader in the design and manufacture of cleaning and surface preparation equipment for structural steel, pipes, and parts washing applications. While our product line has grown to include a wide diversity of cleaning solutions, our depth of experience with high-performance requirements of metal finishing has established LS as the trusted name in the industry.
