

Our Tumble blasters are designed to efficiently and effectively remove dirt, dust, rust, and other debris with a full 360 degree blast.

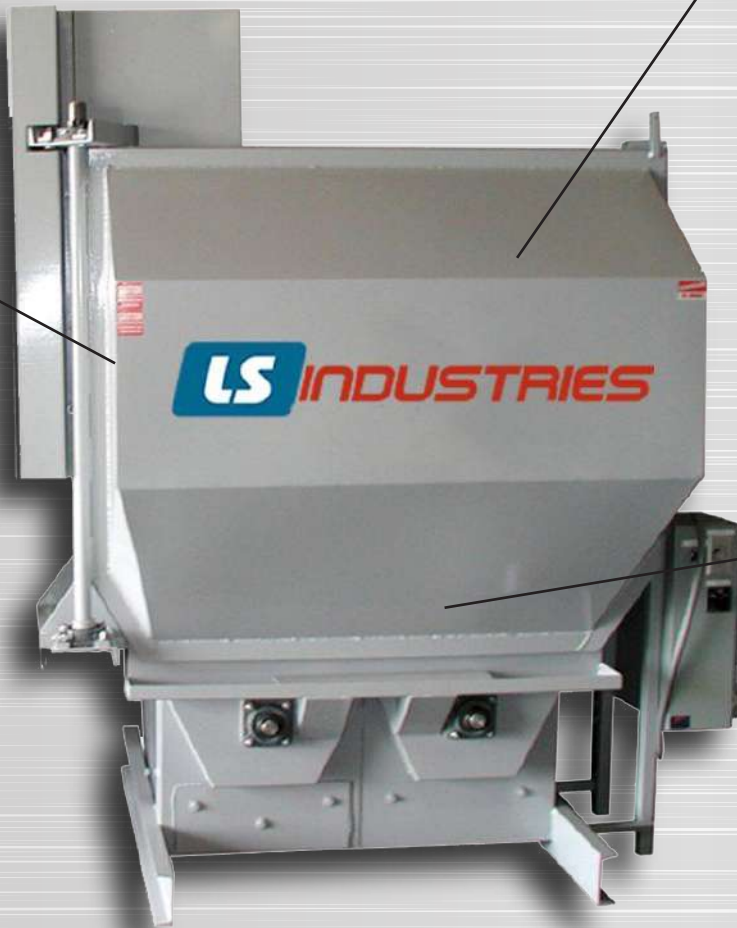

**CUSTOMED
ENGINEERED
SOLUTIONS!**

Wire mesh baskets can hold multiple and a variety of parts in one blast. The part on part contact helps with the cleaning process.

Constructed with heavy-duty steel construction. The door and cabinet are lined with replaceable wear resistant plates for long time use.

The LS TurboShot™ blast wheel uses high volume, bi-directional, medium velocity to efficiently and effectively disperse shot media for a 360 degree blast.
